Claim Rejections - 35 USC § 102

1. Claims 96-106,109 are rejected under 35 U.S.C. 102(e) as being anticipated by Keilman et al (6231516).

The remote power supply and monitoring console is considered to be the planet called for in the above claims, (see columns 7 and 9).

Claim Rejections - 35 USC § 103

2. Claims 107,108,110-120 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keilman et al in view of Cox et al (6141588).

Cox teaches a data digitizer 210, (col. 13, lines 19+) which produces digital signals. Digital technology is commonly used in communication between medical devices, as shown by Cox, and would be seen as an alternative to analog communications to further enhance noise immunity, (see prior art cited by examiner). Claim 116 describes a process of making, not the structure itself. Claim 120 describes intended use, not a structural limitation. Column 14 describes the use of ultrasound as a communication means. Claim 108 describes intended use, however the satellites of Cox could function as repeaters if desired.

Allowable Subject Matter

3. Claims 1-95,137-156 are allowed.

Art Unit: 3762

4. Claims 121-136 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art 6,622,044, US2003/0009204, 6,748,274 and 6,236,889 show the commonality of using digital technology in the medical arts.

Since new rejections have been made, this action is not made final.
